1594 W. North Temple ste 220
PO Box 146300
Salt Lake City, U 84114-6300

Dear Mr. Jones,

This letter is a representation of all of the water users below the Patterson Dam and above the Minersville Reservoir. We have seen and read the letter that was sent to you by Parr, Brown, Gee and Loveless, attorneys for the Rocky Ford Irrigation Company. In reference to that letter, we agree with their opinion as to the Kent's Lake storage of 325 acre feet of water, we also agree that additional storage up to the 1100+/- acre feet should not have been stored, the lower users below the Patterson Dam need their direct flow and the 162 second feet above the Patterson Dam was never reached, so Kent's Lake should not have stored in Three Creeks.

The telemetry that has been installed below the Patterson Dam and at Three Creeks is beneficial and it seems apparent that in an effort to clear some of the other water disputed, further telemetry should be installed on every diversion clear to the mouth of Beaver Canyon, as soon as possible.

We would like to suggest to you, that if you are as tired of this non productive and never ending arguing and bickering over the water as we are, please consider re-adjudicating the entire Beaver River Decree. As far as we know, all parties involved from Kent's Lake to the Minersville Reservoir agree on this.

An attempt to do this was done in August of 1967, see proposed determination, but never completed and signed by the court. The issues therein have only gotten worse since then.

We appreciate your consideration on this matter. Please respond before someone has a heart attack. If you would like to contact me, please call me at 435-310-0357.

Respectfully,

Lower Beaver Users

Bruce Brown - Abendare
Jim Ehler - Barton
